INTERESTS

- Commit every day
on <https://github.com/leephan2k1>
- Learn English every day with
<https://github.com/leephan2k1/binary-dict>
- Read comics every day on: <http://kyotomanga.live>
- Love to drink and make coffee

PROJECTS

Kyoto Manga

<https://kyotomanga.live>

June 2022 - Now

Technologies: NextJS, ReactJS, TailwindCSS,
ExpressJS, MongoDB, FaunaDB.

Description: Kyoto manga is a web app to read comics for free in Vietnamese. This is the project where I spend most of my time improving user interface and user experience in Progressive Web App.

Animan Lab

<http://animanlab.online>

March 2022 - May 2022

Technologies: VueJS, TailwindCSS, ExpressJS, MongoDB

Description: Animan Lab is an anime and manga discussion forum in Vietnamese. I learned about database analysis and representational transition standards when writing back-end code. At the same time, it help me have an overview of the front-end library besides React, which is VueJS

Binary Dictionary

<https://github.com/leephan2k1/binary-dict>

January 2022 - February 2022

Technologies: NodeJS, TailwindCSS, Electron

Description: Binary Dictionary is a desktop English-Vietnamese and Vietnamese-English dictionary app. Project has two versions using binary search and binary tree structure in data structure

EDUCATION

Can Tho University

Software Engineering

August 2019 - Now

- 3 times received a semester scholarship
- GPA: 3.6/4
